

Introduction

Magnetic Media or Electronic Submissions

Natural Gas Marketing Act - Part 4 (APMC-600 Series Forms)

The DOE will accept submissions of marketable Alberta natural gas information (as would normally be reported on the APMC-601, APMC-611, APMC-621, APMC-622, APMC-623, APMC-624, APMC-625, APMC-631(L), APMC-632(L), APMC-633(L), and APMC-651 forms) on a magnetic medium (diskette) or via the Web-based DOE Electronic Transfer System (ETS), once approved by the DOE. Please note that until formal approval is obtained from the DOE for making submissions electronically or on a magnetic medium, you must report all marketable Alberta natural gas information on original forms. Also, additional approval is required when changing the medium and/or method. Contact the Applications Development Department of the DOE for more information on the approval procedures.

This document outlines the submission process and the format standards which **must** be followed when preparing a file for submission.

Note: The DOE is currently able to accept files via the DOE ETS or on the diskette formats as outlined in this document. Other forms of magnetic media submissions may be considered. If you wish to report on a medium other than those specified in this document, contact the Applications Development Department of the DOE to determine if the DOE is capable of processing the medium.
