

GAS OPERATIONS INFORMATION BULLETIN ***November 2000***

Implementation of Multiple Gas Valuation Price: **Reporting of Required Information**

Since early 1999, a joint Industry and Department working group has been developing potential alternatives to a single Gas Reference Price. The "Factor Model" emerged as the preferred alternative. Under this model, a factor calculated for each meter station is used to adjust the intra-Alberta transportation deduction in the current Gas Reference Price Calculation.

A factor will be calculated for each meter station of each pipeline identified by the Department as included in this program. Generally, pipelines will be included if they have access to the ex-Alberta market and published tolls and tariffs. Production that is transported by a non-included Alberta pipeline will continue to be valued at the Alberta Gas Reference Price.

At this time, pipelines to be included are:

- NOVA Gas Transmission Ltd. (NGTL)
- Northwestern Utilities Limited (operating as ATCO Pipelines)
- ATCO Gas and Pipelines Ltd. (formerly Canadian Western Natural Gas Company Limited operating as ATCO Pipelines)
- Westcoast Transmission Company (Alberta) Ltd.
- AEC Suffield Gas Pipeline Inc.
- Alliance Pipeline Limited Partnership

An essential component of the factor model implementation is the development of an information database that identifies physical connections between AEUB (Alberta Energy Utilities Board) facilities and meter stations of included pipelines. For the initial startup, the Department requires operators to complete an "AEUB Facility to Meter Station Connection Report" and "Injection/Reproducing Facility Report". Only a facility operator will receive one or both facility specific reports along with this Information Bulletin. After this initial data preparation process is completed, an operator would report any additions or changes to the Department by submitting a completed TC20. Refer to the attached TC20 form, with reporting instructions ([Attachment A](#)).

To assist operators with identifying meter station information, reference "[Attachment B](#)" which provides a list of receipt meter stations for the included pipelines. If you have any questions regarding pipeline meter stations, please contact Terry Rayne at (403) 297-5467.

Operators are requested to ensure that the Facility to Meter Station Connection Report and the Injection/Reproducing Facility Report are accurately completed and returned to the Department by **December 8, 2000**. Electronic versions of these reports, on a client basis, can be requested by calling Tracey Wadson at (780) 415-2159.

AEUB FACILITY TO METER STATION CONNECTION REPORT

Completion Instructions:

1. Check **only** the "No Pipeline Connection" box, if the AEUB facility is not directly connected to a pipeline.
2. Check **only** the "Not Included Pipeline" box, if the AEUB facility is connected to a "not included pipeline".
3. Check the "Included Pipeline" box, if the AEUB facility is directly connected to an "included pipeline", and provide:
 - Pipeline Code(s) – the numeric system code(s) assigned by the AEUB.
 - Pipeline Name(s) – name/s of the pipeline/s
 - Meter Station(s) Code(s) – the numeric code(s) assigned by the Pipeline.
 - Meter Station Name(s) – name/s of the meter station/s
 - Meter Station Location(s) – the legal description/s of the meter station/s (legal subdivision, township, range and Meridian).

INJECTION/REPRODUCING FACILITY REPORT

Completion Instructions:

NOTE: If there is more than one reproducing facility for an injection facility, then the injection facility operator will choose one reproducing facility for valuation purposes. The royalty obligation and credit will offset based on the factor of the reproducing facility.

1. Check **only** the "No Reproducing Facility" box if the injection facility does not have a reproducing facility.
2. If the "No Reproducing Facility" box is not checked, complete:
Reproducing AEUB Facility Code:
 - Prov. – the province in which the reproducing facility is located; Alberta (AB), British Columbia (BC), or Saskatchewan (SK).
 - AEUB Facility Type – the type of facility; gas plant (GP) or gathering system (GS).
 - The unique code assigned by the AEUB which identifies the reproducing facility.
3. Reproducing Facility Name – the name of the reproducing facility
4. Reproducing Facility Location – the legal description of the reproducing facility (legal subdivision, township, range and Meridian).

TC 20 – APPLICATION FOR FACILITY TO METER STATION CONNECTION

The TC 20 must be submitted by the last day of the month following the production month.

Completion instructions:

PART 1: IDENTIFICATION

- 1.1 Operator ID – the AEUB operator code that identifies the Facility Operator submitting the form.
- 1.2 Operator Name – the full name of the Facility Operator whose code is in 1.1.
- 1.3 Date Prepared – the numeric year, month and day on which the form is prepared.
- 1.4 Contact Person – the name of the person whom the Department can contact concerning information on the form.
- 1.5 Telephone – the telephone number, including area code, of the contact person.
- 1.6 Fax – the fax number, including area code, of the contact person.
- 1.7 Authorized Signature – the signature of the authorized signing officer for the Operator.

PART 2: FACILITY TO METER STATION CONNECTION

- 2.1 AEUB Facility Code:
 - Prov. – the province in which the facility is located; Alberta (AB), British Columbia (BC), or Saskatchewan (SK).
 - Type – the type of facility; gas plant (GP) or gathering System (GS).
 - Code – the unique code assigned by the AEUB which identifies the facility.
- 2.2 AEUB Name – the name of the facility.
- 2.3 Location – the legal description for the facility. (legal subdivision, township, range and Meridian).
- 2.4 Action Code – the action to be taken.
- 2.5 Action – (N) New, (C) Change, (T) Terminate
- 2.6 Not Included Pipeline – check this box if meter station connection is to a not included pipeline and complete **only** the Effective Prod. Month or Termination (Prod. Month) fields. Effective and termination dates will be the first day of that production month.
- 2.7 Meter Station Code – the numeric code assigned by the Pipeline.
- 2.8 Meter Station Name – the name of the meter station.
- 2.9 Meter Station Location – the legal description of the meter station. (legal subdivision, township, range and Meridian).
- 2.10 Pipeline Operator Code – the numeric system code assigned by the AEUB.
- 2.11 Pipeline Name – the name of the pipeline.
- 2.12 Effective Prod. Month – the numeric year and month for the meter station connection to the pipeline. Effective date will be the first day of that production month.
- 2.13 Termination – the numeric year and month for termination of the meter station connection to the pipeline. Termination date will be the first day of that production month.

PART 3: INJECTION FACILITY

- 3.1 Injection Facility Code:
- Prov. – the province in which the injection facility is located; Alberta (AB), British Columbia (BC), or Saskatchewan (SK).
 - Type – the type of facility; gas plant (GP) or gathering system (GS).
 - Code – the unique code assigned by the AEUB which identifies the injection facility.
- 3.2 AEUB Name – the name of the injection facility.
- 3.3 Location – the legal description for the injection facility. (legal subdivision, township, range and Meridian).
- 3.4 Action Code – the action to be taken.
- 3.5 Action – (N) New, (C) Change, (T) Terminate
- 3.6 No Reproducing Facility – check this box if the injection facility does not have a reproducing facility and complete only the Effective Prod. Month or Termination (Prod. Month) fields. Effective and termination dates will be the first day of that production month.
- 3.7 Reproducing AEUB Facility Code: **NOTE: If there is more than one reproducing facility for an injection facility, then the injection facility operator will choose one reproducing facility for valuation purposes. The royalty obligation and credit will offset based on the factor of the reproducing facility.**
- Prov. – the province in which the reproducing facility is located; Alberta (AB), British Columbia (BC), or Saskatchewan (SK).
 - Type – the type of facility; gas plant (GP) or gathering system (GS).
 - Code – the unique code assigned by the AEUB which identifies the reproducing facility.
- 3.8 Reproducing Facility Name – the name of the reproducing facility
- 3.9 Reproducing Facility Location – the legal description of the reproducing facility (legal subdivision, township, range and Meridian).
- 3.10 Effective Prod. Month – the numeric year and month of the meter station connection to the pipeline. Effective date will be the first day of that production month.
- 3.11 Termination – the numeric year and month for termination of the meter station connection to the pipeline. Termination date will be the first day of that production month.

Currently, the expected implementation of the factor model will be effective with the January 2001 month of production, which will be invoiced at the end of March 2001.

This Information Bulletin addresses the reports required to be filed by operators to enable the Department to develop and maintain the information database. Please refer to Information Letter 2000-23 and Information Bulletin 00-10A for additional information.

If you have questions, please contact any of the following persons:

Tracey Wadson – Tel: (780) 415-2159

Shellie Duiker – Tel: (780) 415-6077

Carlene Edden
Director, Gas Operations
Alberta Department of Resource Development

**APPLICATION FOR FACILITY TO
METER STATION CONNECTION
TC 20**

Please complete and mail/fax to

**Department of Resource Development
Attn: Manager, Gas Royalty Help Desk
Fax # (780) 427-3334**

Instructions:

- i) Always complete Part 1.
- ii) (a) In Part 2, check the **Not Included Pipeline** box (*field 2.6*) if the AEUB facility is not connected to an included pipeline and complete Effective Prod. Month (*field 2.12*) or Termination (Prod. Month) (*field 2.13*).

(b) If the **Not Included Pipeline** box (*field 2.6*) is not checked, complete all other fields in Part 2 for facilities that are directly connected to an included pipeline. Included pipelines are:
 - Nova Gas Transmission Ltd.
 - Northwestern Utilities Limited (operating as ATCO Pipelines)
 - ATCO Gas and Pipelines Ltd. Formerly Canadian Western Natural Gas Company Ltd., operating as ATCO pipelines.
 - Westcoast Transmission Company (Alberta) Ltd.
 - AEC Suffield Gas Pipeline Inc.
 - Alliance Pipeline Ltd. Partnership
- iii) **To make changes to information already submitted, complete Part 1 and amend only the applicable part(s) of the TC20 and submit.**
- iv) **The TC 20 must be submitted by the last day of the month following the month of production.**
