

## **INFORMATION BULLETIN 96-01**

January 17, 1996

### **SUBJECT: APMC-611 REPORTING CLARIFICATION**

The APMC-611 is reported by consumers of marketable Alberta natural gas in Alberta that are capable of consuming 100,000 GJ/year. If a facility consumes gas that is sourced partially or completely from general supply, rather than supplied from dedicated sources, the reporter must allocate the supply sources to all of the applicable fields on the 611 form. In order for supply to be considered dedicated to the facility, it must be supported by the evidence, such as within a contract.

If your reporting has deviated from this methodology, amendments must be filed back to the 9401 delivery month. If you have any questions please phone your APMC contact.

W.A. Zanewick  
Director, Gas Valuation
