

Notes:

1. New project or Approved OSR
 - Economic data relating to a NEW project or to CURRENT approved OSR project
2. Amendment Application (not required for NEW project application)
 - Incremental economic data - assuming the project would be a stand-alone project for royalty purposes
 - Data relating to the incremental case and wells only
3. OSR Amended Project (not required for NEW project application)
 - Data relating to the combined project: OSR approved project + Amendment

The Department of Energy is requesting information on production, prices (in real dollar) and costs (in real dollar) based on the operator's best estimate. The Department, however, reserves the right to adjust any or all of the data provided while doing its internal review/analysis, and to ask for supporting data/ clarifications for the economic case(s) provided. All information submitted by an oil sands royalty project applicant is kept confidential.

The Department of Energy requires the operators to submit the following information in order to review their oil sands project application:

Project Identification Section

- Enter:** ERCB approval number if the application is for the new oil sands project approval, or enter approval number if you have ERCB approval for the Amendment being applied for
- Enter:** Existing OSR number for the existing OSR project
- Enter:** Project name
- Enter:** Operator name
- Enter:** Operator ID for Royalty
- Enter:** Application effective date
- Enter:** Notes - provide any additional information/ clarification if needed.

General Information Section

- Enter:** First production year
- Enter:** Last production year (economic cut-off)
- Enter:** Opening unrecovered balance – enter amount in thousands of dollars (as spent)
- Enter:** Year the real dollar refers to
- Enter:** Return allowance rate in percent
- Enter:** Density - provide bitumen density pre blend in kg/m³
- Enter:** Sulphur – provide bitumen sulphur percentage pre blend
- Enter:** TAN – provide bitumen TAN pre blend in mgKOH/gr
- Enter:** Viscosity – provide bitumen viscosity in centipoise at the reservoir temperature in degrees Celsius (C)
- Enter:** Diluent/bitumen ratio
- Enter:** Stream – provide bitumen stream, e.g. WCS, Cold Lake blend, etc.

Table

Year - start at year that matches previously reported PNCB number. If, for example, PNCB was reported in the application to the department for the period ending June 2008, then the data in this table should start as of July 2008 (half-year) and then full years thereafter

- Enter:** Bitumen production volumes (m³) for the year
- Enter:** Number of producing wells for the year
- Enter:** Number of injector wells for the year
- Enter:** Bitumen price (C\$/m³)
- Enter:** WTI price (C\$/bbl) - WTI price should be reported in the Canadian dollars per barrel
- Enter:** Net gas production/consumption (i.e. gas produced less consumed) (GJ) - enter gas consumption as **negative**
- Enter:** Natural gas price (C\$/GJ)
- Enter:** Non-gas variable operating cost (C\$/m³)
- Enter:** Fixed opex – operator has the option to report fixed operating cost in dollars per well per year (C\$/well/yr), or dollars per year (C\$/yr), or both (if applicable). Enter the amount in thousands of dollars
- Opening unrecovered balance : PNCB or previous year unrecovered balance
- Enter:** Other net proceeds - Enter the amount in thousands of dollars
- Gross revenue
- Gross royalty rate (%) - Royalty rates should be reported to the nearest fifth decimal
- Crown royalty based on gross revenue
- Net royalty rate (%) - Royalty rates should be reported to the nearest fifth decimal
- Crown royalty based on net revenue
- Crown royalty payable - The greater of Crown royalty based on gross revenue or Crown royalty based on net revenue
- Total operating costs
- Enter:** Capital expenditures – Sustaining - enter the amount in thousands of dollars
- Enter:** Capital expenditures – Strategic - enter the amount in thousands of dollars
- Enter:** Capital expenditures – Abandonments/Reclamation - enter the amount in thousands of dollars. Enter reclamations cost and end of life liabilities at the end of the project (including dismantlement and decommissioning costs of production facilities)
- Enter:** Number of abandoned wells
- Unrecovered balance before return allowance
- Unrecovered balance after return allowance

Last Updated: December 2008

NPV at the Return Allowance Rate \$0.00

Notes
 * Start at year that matches previously reported PNCB number . If, for example, PNCB was reported in the application to the department for the period ending June 2008, then the data in this table should start as of July 2008 (half-year) and then full years thereafter.
 ** WTI price should be reported in the Canadian dollars per barrel.
 *** Enter gas consumption as negative.
 ****Operator has the option to report fixed opex in either dollars per well per year (\$/well/yr), OR dollars per year (\$/yr), OR both (if applicable).
 *****Royalty rates are internally calculated to the nearest fifth decimal.

NPV at the Return Allowance Rate \$0.00

Notes

* Start at year that matches previously reported PNCB number . If, for example, PNCB was reported in the application to the department for the period ending June 2008, then the data in this table should start as of July 2008 (half-year) and then full years thereafter.

** WTI price should be reported in the Canadian dollars.

*** Enter gas consumption as negative.

****Operator has the option to report fixed opex in either dollars per well per year (\$/well/yr), OR dollars per year (\$/yr), OR both (if applicable).

*****Royalty rates are internally calculated to the nearest fifth decimal.

Albera Oil Sands - Economic Evaluation Data (In-Situ) - Amended Project

New Project: ERCB approval #

Notes:

Project Name: Enter Name assigned to Project
 Operator Name: Enter Name of Operator
 Operator ID: Enter Operator ID
 Application Effective Date: YYYY MM DD

General Information:

First Production Date: YYYY Enter Year
 Last Production Date: YYYY Enter Year

Opening unrecovered balance: \$0 PNCB [in thousands (000's)]

Data in real dollars as of YYYY Enter Year
 Return Allowance Rate:

Density (kg/m3)
 Sulphur (%)

NPV at the Return Allowance Rate \$0.00

Notes

* Start at year that matches previously reported PNCB number . If, for example, PNCB was reported in the application to the department for the period ending June 2008, then the data in this table should start as of July 2008 (half-year) and then full years thereafter.

** WTI price should be reported in the Canadian dollars.

*** Enter gas consumption as negative.

****Operator has the option to report fixed opex in either dollars per well per year (\$/well/yr), OR dollars per year (\$/yr), OR both (if applicable).

*****Royalty rates are internally calculated to the nearest fifth decimal.
