OIL SANDS INFORMATION BULLETIN 2014-17

Subject: Oil Sands Reporting Calendar

This Information Bulletin is for all operators of oil sands royalty Projects, proposed Projects, non-Project mining operations, non-Project well events as defined in subsection 1(1)(v) of the Oil Sands Royalty Regulation, 2009 (OSRR’09) and Crown Agreements.

Alberta Energy will be publishing an annual Oil Sands Reporting Calendar to provide assistance to Operators with identifying deadlines and key dates in an easily accessible format. This calendar is being provided as a courtesy, and will be updated annually.

The deadlines included in the calendar are for regular filing requirements. Any additional deadlines for off-calendar Periods are not included and it is the Operator’s responsibility to track these deadlines. Please note, target dates for the Bitumen Valuation Methodology components are noted for each month but may occur later because these items require information from a third party to be completed.

Alberta Energy will no longer be publishing an IB for the Operator’s Forecast; this deadline reminder will now be included in the Oil Sands Reporting Calendar.

Please note that in the event of a difference between the Oil Sands Reporting Calendar and the legislation, the legislation will always take precedence.

The Oil Sands Reporting Calendar is located on the Alberta Energy Internet: http://www.energy.alberta.ca/OilSands/582.asp
