INTRODUCTION

Land Status Automated System (LSAS) is a computerized database system that provides information on Public Lands (surface) and Crown Minerals in Alberta. This data is essential to the management of agreements that cover publicly owned resources. Data is retrieved through computer terminals distributed throughout Energy, Sustainable Resource Development and other provincial Government departments. Crown Land Data Support is responsible for updating corporate data and training as well as system maintenance and development in conjunction with the system analysts. The powerful automated database of LSAS permits the departments using land data to better serve the needs of the public.

The primary applications of the system are: (a) to provide access to accurate and timely information relating to public land, and surface and mineral interests on crown land. This is provided through direct terminal access for government agencies. The Public sector can access this data by the provision of hard copy reports on request or access to the Electronic Transfer System (ETS) which provides search capabilities through the internet. And (b) to support the data capture requirements of government departments through the input and maintenance of their data, e.g. all activities and land for Alberta Sustainable Resource Development, petroleum and natural gas agreement for Alberta Department of Energy.

Examples of the administrative processes supported by LSAS are: access to land standing information, data recording and maintenance, application approval, disposition review and statistical/management reporting.

The data components include:

- (a) clients - all clients having an interest in Public Lands or Crown Minerals;
- (b) activities - all surface dispositions, mineral agreements, etc.;
- (c) land - all Alberta township land and public subdivided land defined by a plan block lot reference;
- (d) geo administrative areas - such as provincial parks, special areas, etc.

Search described in this book.

1) Activity standing search

This publication provides samples of this search format available from the LSAS Surface subsystem, the applicable fees and explanations of the various data fields contained within each report.

All agreements and data displayed within these samples are for illustrative purposes only. All persons making use of this publication are advised that the material does not have any legislative or official government sanction, and accordingly is not binding in any way upon the Government of Alberta, and, in particular, ALBERTA DEPARTMENT OF ENERGY

For further information or to request searches, please contact

ALBERTA DEPARTMENT OF ENERGY /Crown Land Data Support

3rd Floor 9945 – 108 Street
Edmonton, Alberta, Canada T2P 3W2
TELEPHONE: (780) 422 - 5727
E-mail inquiries can be sent to:
crownlanddatasupport@gov.ab.ca

Or from the

Electronic Transfer System (ETS) at WWW.energy.gov.ab.ca

ACTIVITY STANDING SEARCH

This report will provide details of all activities etc. which intersect the land description of the requested activity. It is the equivalent of a Public land standing for all lands on the requested activity. This report will provide activity information which includes; Requested Activity and Land, Ownership Status, Administered by, Titled Status, Survey Status, Geo-Administrative, Activities and Titles, Status/Type, Various Dates, Metes and Bounds Remarks Client, Total Area, Option to Purchase, Within 100m of Water, Purpose, Dimensions, FLW Plan No, Item, Version Date, Survey Co, Client File No, LTO Plan No, Additional Plans, Activity, Client Id, Client Name/Address, Province, Postal Code.

- 1) Request Requirements.
Activity type(s) and Activity Number(s)
Eg. PLA 2313

- 2) Report Sort.
Sorted by Activity

- A) Fee.
\$1 per land parcel reported with a minimum fee of \$5.00 to a maximum of \$75.00 for each activity standing report.
Surcharge for an activity searched, where the search is requested and provided on a rush basis \$10.00

Data Fields Within the Activity Standing Search

REPORT HEADING

REPORT DATE AND TIME: Date and time the activity standing search was generated by the Land Status Automated System (LSAS).

1 SELECTION CRITERIA

Displays options chosen to define the search.

2 REQUESTED ACTIVITY

Show the requested Activity/Activities

3 REQUESTED LAND

REQUESTED LAND: Describes requested crown lands which are contained within the activity(s) selected by meridian, range, township, section(s) and part section(s).

OWNERSHIP STATUS: Ownership displayed. Crown, Freehold, Mixed (both Crown and Freehold occur on apportionments of the parcel), Other (portion of parcel exists which could not be accurately defined, is also defaulted when parcel of land is created at LSD level or lower).

ADMINISTERED BY: Describes the Administration agency with remarks.

TITLED STATUS: Indicates whether or not title has been issued and is resident at the Land Titles office under the Land Titles Act as evidence of ownership of a parcel of land. Titled, Untitled, Mixed (apportionments of the parcel can be titled and untitled), Other (portion of parcel exists which could not be accurately defined, is also defaulted when parcel of land is created at LSD level or lower). TITLED Term used to denote when a Title has been issued.

SURVEY STATUS: Indicates whether parcel was surveyed, values are, Surveyed, Unsurveyed, Partly surveyed, Water (parcel may be covered by water).

AREA IN HECTARES/ACRES

LAND: Total number of hectares or acres in the requested land.

TITLE: Total number of hectares or acres in the Title of the requested land.

WATER: Indicates whether parcel contains any significant bodies of water.

4 GEO-ADMINISTRATIVE AREAS

Represents a land based boundary for administrative purposes or for the administration of a specific program by a Provincial or Federal Government Department or Agency. Any Geo-Administrative information relative to the lands requested will be reported. This includes the type of Geo-Administrative identifier, the area and sub-area (if applicable). If a Geo-Administrative area covers only part of the quarter sections requested, those quarter section legal descriptions will be displayed with the applicable Geo-Administrative area.

5 ACTIVITIES AND TITLES

Describes requested crown Land, Activity or Geo-Administrative area.

Each quarter section requested is listed in this section. In the case of titled land, this information is shown first under the legal descriptions within which they occur. Activity then subdivision information follows the title information.

LAND/ACTIVITY

Each quarter section requested is listed in this section. In the case of titled land, this information is shown first under the legal descriptions within which they occur.

Pseudo Revestment: The act of creating a Certificate of Title in the name of the crown, (so that an activity can be registered against the title).

STATUS/TYPE: Indicates the current stage in the life cycle of an activity.

DATE: The date an interest on Crown land comes into force.

EXPIRY: The date a interest on Crown land is due to expire, or to be reviewed.

METES AND BOUNDS REMARKS CLIENT:

A description of the boundaries of the parcel of land by measurement distance and/or natural man-made boundaries. The name of an individual, company, organization or government body.

TOTAL AREA: Total area covered by the activity and (in brackets) the area of the activity within the legal description listed.

ACTIVITY DETAIL INFORMATION

Data displayed depends on the activity type/admin data category.

OPTION TO PURCHASE (Y/ N): Indicates whether or not an option to purchase the Surface Disposition has been incorporated into the agreement.

WITHIN 100M OF WATER (Y/ N): Indicates whether or not the Activity is within 100 meters of a body of water.

PURPOSE: Indicates the purpose of the disposition.

DIMENSIONS: General text defining the physical dimension of the disposition.

FLW PLAN No: The technical services plan number under which the plan/sketch is filed at the Public Lands Division.

ITEM: Identifies additional plan for the activity, ie: plan extension.

VERSION DATE: The date the plan has been received in the documentation area.

SURVEY CO: The Survey Company's name.

CLIENT FILE No: The client company's own file number of the disposition.

LTO PLAN No: Related to Alberta Land Titles Office file reference number.

ADDITIONAL PLANS: Any Additional plans.

6 DISCLAIMER

7 CLIENT ADDRESS LIST

ACTIVITY: The activity type code along with its unique file (serial) number.

CLIENT ID: Is the client identifier stored in LSAS Client Registry.

CLIENT NAME/ADDRESS: The name of an individual, company, organization or government body and mailing address.

PROVINCE: Shows which province the Client address is from.

POSTAL CODE: Postal code in accordance with Canada Post.

SURFACE ACTIVITY CODE TABLE**ACTCODES**

To provide as much information as possible within the space available, LSAS uses codes to represent activity types. These codes are in the left hand column of the activities section of a report. The codes are three alpha characters representing the type (ie: LOC is a Licence of Occupation) with the numbers following being the unique file identifier for the activity (ie: 970022).
