# **LSAS - MINERAL RESOURCES SEARCHES**

## **INTRODUCTION**

The Land Status Automated System (LSAS) forms the official departmental record of all instruments recorded, pursuant to the Mines and Minerals Act, that grant or reserve rights to a crown mineral. The Mineral Subsystem of LSAS is maintained and administered by Alberta Department of Energy, Crown Land Data Support.

Land Status Automated System (LSAS) is a computerized database system that provides information on Public Lands (surface) and Crown Minerals in Alberta. This data is essential to the management of agreements that cover crown resources. Data is retrieved through computer terminals distributed throughout Energy, Sustainable Resource Development and other provincial Government departments. Crown Land Data Support is responsible for updating corporate data and training as well as system maintenance and development in conjunction with the system analysts. The powerful automated database of LSAS permits the departments using land data to better serve the needs of the public.

The primary applications of the system are: (a) to provide access to accurate and timely information relating to public land, and surface and mineral interests on crown land. This is provided through direct terminal access for government agencies. The Public sector can access this data by the provision of hard copy reports on request or access to the Electronic Transfer System (ETS) which provides search capabilities through the Internet. And (b) to support the data capture requirements of government departments through the input and maintenance of their data, e.g. all activities and land for Sustainable Resource Development, mineral agreements for Alberta Department of Energy.

Examples of the administrative processes supported by LSAS are: access to land standing information, data recording and maintenance, application approval, disposition review and statistical/management reporting.

The data components include:

- (a) clients - all clients having an interest in Public Lands or Crown Minerals;
- (b) activities - all surface dispositions, mineral agreements, etc.
- (c) land - all Alberta township land and public subdivided land defined by a plan block lot reference
- (d) geo administrative areas - such as provincial parks, special areas, etc.

Search described in this book.

1) Land Tenure Client Information

This publication provides samples of these search formats available from the Mineral subsystem, the applicable fees and explanations of the various data fields contained within each report.

**All agreements and data displayed within these samples are for illustrative purposes only. All persons making use of this publication are advised that the material does not have any legislative or official government sanction, and accordingly is not binding in any way upon the Government of Alberta, and, in particular, ALBERTA DEPARTMENT OF ENERGY**

## **Data Fields Within the Mineral Resources** **Land Tenure Client Information**

**REPORT DATE AND TIME:** Date and time Mineral Agreement Search was generated by the Land Status Automated System (LSAS).

**CLIENT ID:** Is the client identifier assigned to a unique company, Government Department or individual name and their address which is stored in LSAS client registry.

**CLIENT STATUS:** Describes status of client, e.g., Active, Cancelled.

**CORES STATUS:** Describes the status of the client in the Corporate Registry System (CORES) e.g., Liable for Strike Off, Struck Off, In Receivership, In Liquidation.

**CAN NUMBER:** The Corporate Access Number as assigned by Consumer & Corporate Affairs.

**PRA ROYALTY CLIENT ID:** Is the client identifier stored in the Petroleum Registry of Alberta (PRA).

**EUB OPERATOR CODE:** Operator code utilized by Energy and Utilities Board.

**LAST UPDATE DATE:** Last date any data field was updated on the agreement.

**CLIENT NAME / ADDRESS :** Name and postal address that has been recorded as the address where all correspondence is to be forwarded.

## Abbreviations & Acronym's

AEUB	Alberta Energy and Utilities Board (also EUB)
CORES	Corporate Registry
DOE	Department of Energy
DRRZD	Deeper Rights Reversion Zone Designation
ETS	Electronic Transfer System
EUB	Energy and Utilities Board (also AEUB)
GEO	Geophysical
GLC	General Land Classification
LE LS SC TWP RG M E	legal event-legal-section-township-range-meridian-event sequence
LSAS	Land Status Automated System
LSD	legal subdivision (also LS)
LTO	Land Titles Office
M	Meridian
MRIS	Mineral Revenues Information System (replaced by PRA)
PBL	Plan Block Lot
PNG/P&NG	Petroleum and Natural Gas
PRA	Petroleum Registry of Alberta
R	Range
SEC	Section
SU	Spacing Unit
TWP	Township
ZD	Zone Designation
