# **LSAS - MINERAL RESOURCES SEARCHES**

## **INTRODUCTION**

The Land Status Automated System (LSAS) forms the official departmental record of all instruments recorded, pursuant to the Mines and Minerals Act, that grant or reserve rights to a crown mineral. The Mineral Subsystem of LSAS is maintained and administered by Alberta Department of Energy, Crown Land Data Support.

Land Status Automated System (LSAS) is a computerized database system that provides information on Public Lands (surface) and Crown Minerals in Alberta. This data is essential to the management of agreements that cover crown resources. Data is retrieved through computer terminals distributed throughout Energy, Sustainable Resource Development and other provincial Government departments. Crown Land Data Support is responsible for updating corporate data and training as well as system maintenance and development in conjunction with the system analysts. The powerful automated database of LSAS permits the departments using land data to better serve the needs of the public.

The primary applications of the system are: (a) to provide access to accurate and timely information relating to public land, and surface and mineral interests on crown land. This is provided through direct terminal access for government agencies. The Public sector can access this data by the provision of hard copy reports on request or access to the Electronic Transfer System (ETS) which provides search capabilities through the internet. And (b) to support the data capture requirements of government departments through the input and maintenance of their data, e.g. all activities and land for Sustainable Resource Development, mineral agreements for Alberta Department of Energy.

Examples of the administrative processes supported by LSAS are: access to land standing information, data recording and maintenance, application approval, disposition review and statistical/management reporting.

The data components include:

- (a) clients - all clients having an interest in Public Lands or Crown Minerals;
- (b) activities - all surface dispositions, mineral agreements, etc.;
- (c) land - all Alberta township land and public subdivided land defined by a plan, block, lot reference.
- (d) geo administrative areas - such as provincial parks, special areas, etc.

Searches described in this book.

1) Restriction Search

This publication provides samples of these search formats available from the Mineral subsystem, the applicable fees and explanations of the various data fields contained within each report.

**All agreements and data displayed within these samples are for illustrative purposes only. All persons making use of this publication are advised that the material does not have any legislative or official government sanction, and accordingly is not binding in any way upon the Government of Alberta, and, in particular, ALBERTA DEPARTMENT OF ENERGY**

These searches are available upon request from:

ALBERTA DEPARTMENT OF ENERGY /Crown Land Data Support

3<sup>rd</sup> Floor 9945 – 108 Street  
Edmonton, Alberta, Canada T2P 3W2  
TELEPHONE: (780) 422 - 5727  
E-mail inquiries can be sent to:

Or from the

Electronic Transfer System (ETS) at [WWW.energy.gov.ab.ca](http://WWW.energy.gov.ab.ca)

## **RESTRICTION SEARCH**

This report will give detailed information about the requested restriction. Restrictions apply to areas in the province of Alberta that have surface access or geologic concerns in the development of mineral resources.

- 1) A report will be provided when a restriction ID is supplied.
- 2) Report sort  
By Restriction ID
- 3) Fee  
\$6.00 per restriction.

# **Data Fields Within the Restriction Detail Report**

## **RESTRICTION: REPORT HEADING**

REPORT DATE AND TIME: Date and time Restriction Search was generated by the Land Status Automated System (LSAS).

RESTRICTION ID: Key ID identifying the specific restriction detail, comprised of the classification type and number and a two digit numeric for each specific detail within the classification e.g. BSA 0001 01 Pakowki Lake Bird Sanctuary Detail 01 ( table RESTTYP)

OR

RESERVED/WITHDRAWN FROM DISPOSITION: Has the same data fields as Restriction Id. Withdrawn means the land /subsurface rights are permanently withdrawn from disposition. Reserved means the land /subsurface rights are temporarily withdrawn from disposition

## **1 RESTRICTION: RESTRICTION CLASSIFICATION**

RESTRICTION CLASSIFICATION NUMBER: Key ID identifying the specific restriction classification, comprised of the classification type and number e.g. BSA 0001 Pakowki Lake Bird Sanctuary (see table RESTTYP)

NAME: Name of the restriction area.

STATUS: Describes the current standing of the restriction classification, e.g., active, cancelled (see table ENSTATS).

EFFECTIVE DATE: Date the restriction classification became effective.

EXPIRY DATE: Date the restriction classification expires.

FILE NBR: Reference to the paper file that contains information pertaining to a restriction classification.

OTHER REFERENCE: Allows free text entry of other related reference materials.

CREATION DATE: Date restriction classification was created in LSAS.

LAST UPDATE DATE: Last date any data field was updated on the restriction classification.

LAST UPDATE TIME: Last time any data field was updated on the restriction classification.

## **2 RESTRICTION: RESTRICTION DETAIL**

RESTRICTION DETAIL NUMBER: Key ID identifying the specific restriction detail, comprised of the classification type and number and a two digit numeric for each specific detail within the classification e.g. BSA 0001 01 Pakowki Lake Bird Sanctuary Detail 01 (see table RESTTYP)

NAME: Name of the restriction area.

STATUS: Describes the current standing of the restriction detail e.g. active, cancelled (See table ENSTATS).

EFFECTIVE DATE: Date the restriction detail became effective.

EXPIRY DATE: Date the restriction detail expires.

SURFACE ACCESS LEVEL: Describes the type of surface access allowed.

MINERAL ACTIVITY: Describes the mineral activity effected by the restriction detail.

SECURITY TYPE CODE: Describes the security level of the restriction detail e.g. public. (see table RESTSECR)

AREA: Area in hectares of the restriction detail.

CREATION DATE: Date restriction detail was created in LSAS.

LAST UPDATE DATE: Last date any data field was updated on the restriction detail.

LAST UPDATE TIME: Last time any data field was updated on the restriction detail.

### **3 RESTRICTION: RESTRICTION DETAIL REMARKS**

REMARK TYPE: Description of type of remark.

REMARKS: Textual information applicable to the restriction detail.

### **4 RESTRICTION: RESTRICTION TEXT**

RESTRICTION TEXT ID: A five digit code e.g. ENR01 where the first three characters describe the department or agency responsible for the restriction (see table RESTAGCY) followed by a two digit consecutive number.

STATUS: Describes the current standing of the text e.g., active, cancelled (see table ENSTATS).

CREATION DATE: Creation date of the text detail.

LAST UPDATE DATE: Last date restriction detail text was updated.

LAST UPDATE TIME: Last time restriction detail text was updated.

TEXT: Written description of the specific restriction.

### **5 RESTRICTION: CONTACT DETAIL**

CONTACT CODE/NAME: Is a four character code e.g. W001 which provides the contact name and their telephone number. This person is responsible for the restriction detail and a source of information on it's exact nature.

TITLE: The working title of the contact

TELEPHONE NUMBER: Telephone number of the contact

CLIENT CODE/NAME AND ADDRESS: Is the client identifier stored in the LSAS client registry. It contains the company or governmental department name and address.

### **6 RESTRICTION: LAND / ZONE DESCRIPTION**

LAND DESCRIPTION: Describes unitized lands by meridian, range, township, section(s) and part of section(s) (see LSAS Land Formats).

SUBSTANCE / ZONES: Describes substance(s) and zone(s), which are unitized.  
e.g. petroleum and natural gas in Mannville.

## **7 RESTRICTION: RESTRICTION DETAIL AGREEMENTS**

RESTRICTION DETAIL/AGREEMENTS: Identifies all mineral agreements which are affected by the restriction and have it added as an addendum.

AGREEMENT TYPE / NUMBER: The first three characters identifies the agreement type, e.g., applications, postings or agreements (see table AGRTYPE). The remaining characters are a unique agreement number assigned by The Department of Energy.

For a 10 - Digit Agreement Number

1st and 2nd Digits	Equivalent to last two digits of the agreement type.
3rd and 4th Digits	Year in which term commences (last two digits only).
5th and 6th Digits	Month in which term commences.
7th Digit	0 (zero) to indicate original agreement; A, B, C, etc., to indicate a divided or partially transferred agreement.
8th, 9th, and 10th Digits	Sequence of agreements issued in month.

DESCRIPTION: Description of the agreement type (see table AGRTYPE).

## **8 RESTRICTION: SURFACE IDS**

SURFACE ID: Identifies the surface activity ID(s) that correspond to the restriction detail. They represent a land-based boundary. This includes the type of Geo-Administrative identifier, the area and sub-area (if applicable)

## **9 RESTRICTION: DISCLAIMER**
